

2027 auction and draft value board

Every player likely to be available in the 2027 MLP auction, rated on the PKLStats Rating v2, with a transparent price estimate built from published 2026 prices, value per dollar, tiers, and demand from the 20 PKLStats team dossiers. The 2027 rules are **proposals** as of 9 October 2026, so every availability statement **depends on** them. Only UPA-signed players may play MLP: players whose eligibility is unclear or unlikely stay on the board, flagged, but are left out of supply, top values, alternatives and shortlists. Estimated prices are PKLStats estimates with wide intervals, never reported fees.

TOP 10 VALUES (WHOLE POOL)

#	PLAYER	V2	TIER	EST. PRICE	PTS/\$100K
1	Martin Emmrich Roster disputed	97.1	Value	\$6k	84.9
2	Layne Sleeth MLP release (K)	100.0	Value	\$20k	39.6
3	Jessie Irvine MLP release (K)	100.1	Value	\$20k	39.3
4	James Delgado MLP release (K)	99.9	Value	\$20k	39.3
5	Ewa Radzikowska Former MLP	99.2	Value	\$19k	37.0
6	Alix Truong MLP release (K)	99.0	Value	\$19k	36.3
7	Pablo Tellez MLP release (K)	98.9	Value	\$19k	35.9
8	Maggie Brascia Non-MLP (tour)	98.8	Value	\$19k	35.6
9	Matt Wright Non-MLP (tour)	101.9	Starter	\$28k	34.7
10	CJ Klinger MLP release (K)	102.4	Starter	\$31k	33.3

Pts/\$100k = (v2 overall – 92.1) per \$100k of estimated price. The price curve is steep, so cheap players rated about 98–102 dominate.

Ranked by PKLStats Rating v2 in the discipline; tiers are the 90th/60th/30th percentiles of all qualifying 2026 players in that discipline. Includes keepable players whose keep call is open (K) and rated players not on a 2026 roster ('ext.' ratings: same model, tour results and any MLP games). Status wording matches the dossiers; the full sentence is in the XLSX/CSV. 'MLP-eligible' flags players without a confirmed UPA contract (see Who can play MLP).

Ranked by PKLStats Rating v2 in the discipline; tiers are the 90th/60th/30th percentiles of all qualifying 2026 players in that discipline. Includes keepable players whose keep call is open (K) and rated players not on a 2026 roster ('ext.' ratings: same model, tour results and any MLP games). Status wording matches the dossiers; the full sentence is in the XLSX/CSV. 'MLP-eligible' flags players without a confirmed UPA contract (see Who can play MLP).

Ranked by PKLStats Rating v2 in the discipline; tiers are the 90th/60th/30th percentiles of all qualifying 2026 players in that discipline. Includes keepable players whose keep call is open (K) and rated players not on a 2026 roster ('ext.' ratings: same model, tour results and any MLP games). Status wording matches the dossiers; the full sentence is in the XLSX/CSV. 'MLP-eligible' flags players without a confirmed UPA contract (see Who can play MLP).

Contested targets

Demand is the number of the 20 PKLStats dossiers that shortlist a player, after the fix that sizes each team's list to its cap room (keepers deducted) and discounts players already on other lists. 'Before' is the 9 Oct phase-2 version, where six players were on all 20 lists.

Alternatives: expected in the pool, same gender, Starter tier or better in the gender-doubles discipline, on 6 or fewer dossier shortlists (was 4: once players without a confirmed UPA contract left the shortlists, their slots went to eligible players and no eligible Starter+ player was left on 4 or fewer), estimated price at most 40% of the star's, not predicted or likely to be kept by ROFR, MLP-eligible or likely eligible (UPA contract). Ranked by gender-doubles v2; each player is suggested once (strongest star first). Not like-for-like: none matches the star's rating.

Price expectations: bargains and overpriced risks

A PKLStats estimate, not a reported fee. Fitted on the 80 published 2026 prices (66 draft bids from The Kitchen live blog and 14 keeper prices from pickleball.com that are not also 2026 bids). log(price) is regressed on the v2 rating with an extra slope above 100; this specification had the lowest leave-one-out error of 9 pre-listed specifications (gender and best-discipline terms did not help). Where a player has a published 2026 price, the 2027 estimate is the geometric mean of the model price and that price. Estimates are capped at \$800k, the upper end of the proposed per-player cap.

R² 0.39 in sample. Leave-one-out RMSE 1.20 log points, against 1.49 with no model. Spearman ρ 0.51. The 80% interval (×/÷4.7) covered 79% of held-out prices. Only 2 prices are above v2 113 (Bright, Jorja Johnson), so the top of the curve is thin.

Flags use the player's own 2026 price only: more than one leave-one-out error below or above the rating-only model. Players without a published 2026 price get no flag. Keeper prices are what a team pays to keep a player, not a market bid; 34 of 48 equal the player's 2026 bid and are counted once.

Supply vs demand by discipline and gender

Demand: need slots in the 20 dossiers ('two starting' needs count 2). Supply: board players expected in the pool (MLP releases stated, implied or expected (K), plus rated players not on a 2026 roster) at each tier of the discipline's v2 rating. Keepable players whose keep call is open are left out of supply, and so are players whose MLP eligibility is unclear or unlikely (no confirmed UPA contract); the last two columns show how many Starter+ players that removes.

Who can play MLP: flagged players

MLP's 2026 rules: "Per usual, ONLY UPA-signed players may play MLP" (majorleaguepickleball.co, 5 Feb 2026). No 2027 eligibility rule is published. Contract status comes from DinkBank's player pages (an independent tracker that shows UPA tier only, checked 9 October 2026) and the APP's official signing list. These 37 players stay on the board but are **not** counted in supply, top values, alternatives or dossier shortlists.

Likely eligible (20, counted in supply): George Wall, Etta Tuionetoa, Matt Wright, Ewa Radzikowska, Maggie Brascia, Estee Widdershoven, Martin Emmrich, Lucy Kovalova, Julian Arnold, Mary Brascia, Chloe Iglesias, Marshall Brown, Lauren Stratman, Collin Johns, Juan Benitez, Andrea Koop, Brooke Caruso, Mohaned Alhouni, Joey Wild, Gregory Dow. Likely = a single indication of a UPA contract (DinkBank tier without a 2026 MLP roster, or a 2026 roster without a DinkBank record).

'Unclear' players with no UPA contract could still sign before the April 2027 draft: in 2024, unsigned players could be drafted and earn an entry-level contract (pickleball.com, 29 Mar 2024). Several APP players withdrew from the 2024 draft to keep playing the APP (Fudge, DeHeart; Braverman and Barr withdrew their applications). Evidence and source links for every player: data/eligibility/eligibility.csv and the 'MLP eligibility' sheet of the XLSX.

Method and caveats

POOL

- **MLP releases (K):** 2026 end-of-season players whose release is stated, implied (not named among keepable players) or expected (keepable, but the article expects a release), from pickleball.com 'MLP 2027: A look ahead' (1 Sep 2026).
- **Keep call open (K):** keepable players the article does not project as kept. Shown, but not counted in supply.
- **ROFR holder:** under the proposed rule each team may once match the winning bid for a player it released, so the 2026 team holds it. Players whose team is predicted or likely to use it (Waters, Oncins) appear only on that team's dossier shortlist.
- **Not on a 2026 roster:** rated players with no 2026 MLP games, ≥ 30 tour doubles matches since 1 Jan 2025, a tour match in 2026 and a v2 at or above replacement (92.1). Also included: 1 2026 MLP player(s) and 1 2026 draftee(s) not on an end-of-season six. Their MLP eligibility is assessed player by player (box below).
- **Roster disputed:** 1 rated player(s) on a pickleballinsiders end-of-season roster but not in the keeper review's six (K): Martin Emmrich. Shown with that team as a possible ROFR holder.

RATINGS

The PKLStats Rating v2, unchanged, for the 101 qualifying players. Others use the same fitted model and scale ('ext.'): an MLP player below 10 games gets the model value; a player with no MLP games gets the model's tour-based starting value. Bands: 200 bootstrap refits (MLP games and tour matches). Tour data end in early May 2026.

VALUE AND TIERS

Points above replacement (92.1, the 20th percentile) per \$100k of the estimated price. Tiers use the 90th, 60th and 30th percentiles of the 2026 qualifying players: overall 113.0, 100.3, 94.0; by discipline in the tier lists.

WHO CAN PLAY MLP

Confirmed (MLP, 5 Feb 2026): "ONLY UPA-signed players may play MLP". An APP contract alone does not bar a player (APP deals are non-exclusive; APP-signed Casey Diamond played MLP in 2026), but a UPA contract is required. **Not confirmed:** any 2027 eligibility rule, draft declaration, ranking or DUPR minimum. **Board:** 88 eligible, 20 likely, 22 unclear, 15 unlikely; only the first two count in supply, values, alternatives and shortlists (see Who can play MLP pages).

PRICE MODEL

rating + hinge@100: $\log \text{price} = 9.902 + 0.0488 \cdot (v2 - 100) + 0.1341 \cdot \max(0, v2 - 100)$. Implied curve: v2 94 → \$15k, 100 → \$20k, 106 → \$60k, 113 → \$215k, 116 → \$372k, 120 → \$774k (cap \$800k). 2026 prices were set under 2026 rules; the proposed 2027 cap could move prices a long way. Check on what bidders could know: on the 66 bids, the v2 as it stood on draft day (27 Feb 2026) fits about as well as the end-2026 v2 (R^2 0.40 vs 0.37; leave-one-out error 1.20 vs 1.22).

DOSSIER SHORTLISTS (FIX)

Each team's cap room = \$1m – projected keeper prices. Starter slots = its gender-doubles need slots; other open slots are reserved at the Value-tier price. The stretch target must fit room minus the other slots' minimums; budget and value picks must fit room ÷ starter slots; mixed third players must fit the bench budget. Teams are processed from most to least room, and each pick is discounted 1 point per earlier list. Repetition: mean pairwise overlap 0.49 → 0.21; distinct players 53 → 55; maximum lists 20 → 12.

CAVEATS

- 2027 rules are proposals; every availability **depends on them**.
- Prices are estimates with $\times/\div 4.7$ intervals, not reported fees.
- Ages: pickleball.com profiles; for non-roster players, accepted only from a name-matched 'Tour Pro' profile. Identity is not otherwise confirmed.
- We tested Real Clear Stats' Player Impact+ ratings as an input; they did not improve out-of-sample predictions, so they carry no weight in the PKLStats Rating.
- Tour data end in early May 2026; ratings of tour-only players rest on tour results alone.
- Value per \$100k favours cheap players rated about 98–102, because the price curve is flat below 100. Use it with the tier, not alone.
- The allocation order in the dossiers (reverse 2026 win %) is an assumption, labelled illustrative.
- Fix applied with this board: Anna Bright ('expected keep (price set by league, rumoured ~\$600k)') is now a projected St. Louis keeper in the dossiers.
